Release Notes

Enhancements/New Features	
S.No.	Added Features
1	The instructions, types of ADC present can be viewed by switching between the tabs present.
2	The pre-defined configuration of the ADC can be edited by pressing EDIT CONFIGURATION button.

Bug Fixes	
S.No.	EXE issue
1	Issues in file handling was handled, now the application need not be run as an administrator.

Known Issues / Limitations	
S.No.	Issue present in the GUI
1	The display of Channel names in the Graph is displayed properly only by selecting or unselecting the Channel Selector. This issue occurs while moving from one ADC type to another.
2	Channel when unselected and after that stopping the Data acquisition, now when again selecting START, the channel which was unselected will remain selected but the data will not be visible in the graph. After unselecting and selecting once again it will work fine.
